Re: REVIEW OF THE PREMISES LICENCE – WALMSLEY ARMS

Dear Sir,

I am currently compiling the report and I have noticed a condition of licence that the Police imposed on the last variation back in 2016, namely that:-

Each week the DPS will carry out a detailed risk assessment prior to opening the premises to ascertain how many, if an SIA door supervisors are required to ensure the premises is operated safely in order to promote the licensing objective for the prevention of Crime and Disorder. The DPS will also take into account any advice provided by the Police on these occasions. The risk assessment will be in written format and available to the Police, if requested, for a period of 28 days.

Could you please provide copies of the written risk assessments since the imposition of this condition on 22nd June 2016 and the dates upon which the Police visited your premises to check and review the risk assessments?

As you are aware, two objections were withdrawn last year on the grounds that assurances, via your solicitor, had been given that steps had been put in place to address noise and disturbances and one of these steps being the above mentioned condition. It is therefore, reasonable to ask that such a condition is being complied with.

I would be grateful therefore, if you would provide this information no later **than Tuesday 31st January, 2016**. Should you have any questions in relation to this letter or the review, please do not hesitate to contact me on the above number.

Yours faithfully

Katherine Parry
Licensing Manager
